

Evidence for Learning

Dear Parents and Carers,

What is Evidence for Learning

Evidence for Learning (EfL) is software that can be accessed through a browser to record the learner's journey through both photographic and video evidence, as well as teachers' observations. EfL allows class teachers to share evidence with parents and carers.

There is also the option for you, as a parent or carer, to upload your own photos for class teachers to see.

The sharing of photos, videos and comments helps us create a dialogue between home and school, around your child's experiences and learning.

How to sign up?

Signing up is simple, all you need to do is provide us with up to two email addresses which we then add to the system and activate.

You will receive two emails, the first will contain a link to your child's area, and the second will contain a temporary password which you can then change to something more memorable.

Name of Child:.....

I/We would like to sign up to EfL

- Email address 1:.....
- Email address 2:.....
